

Journeys in Survey Research: Guide to page and pop-out menus

[Revised version: **Draft only**, 27 Feb 2014]

There are 116 web pages (including hidden pages) on survey research topics, some of which contain links to *.pdf or other files held on the site.

Life in France

Main menu at left. Home page is displayed at entry.

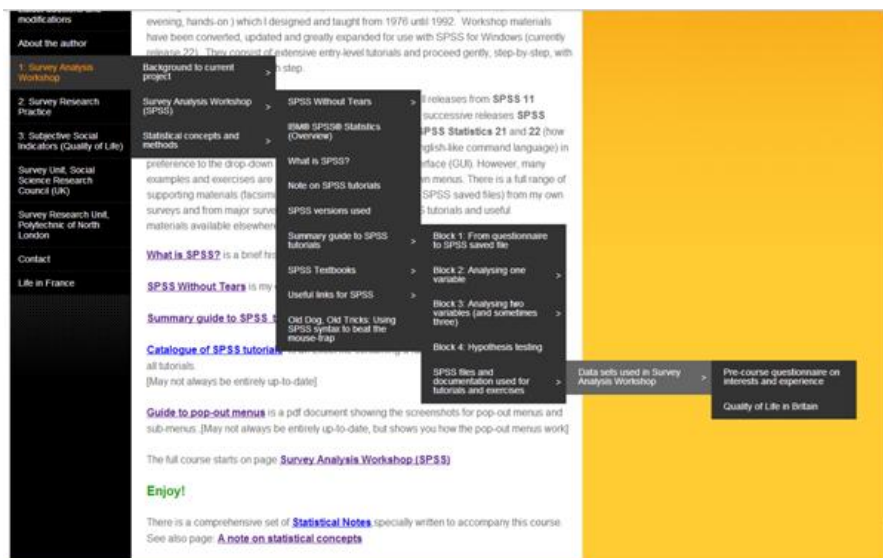

Hovering over menus will release pop-out sub-menus (if any) as per the guide below: these happen very fast, especially if your mouse tends to wander!

Clicking on menus will display the appropriate web page. Contents of menu pages are **different** from contents of any sub-menus.

All pages contain hyperlinks to sub-menus, but many pages have hyperlinks to files on hidden pages on this site or to relevant material on other sites. Most of the files on this site are in *.pdf format, either reports, questionnaires etc., or SPSS tutorials, but some are raw data files in *.txt format (from surveys) and others are SPSS syntax, saved or viewer files in *.sps, *.sav or *.spv format: some are slide-shows in *.ppt format and one or two are Excel files in *.xlsx format.

To date there are 514 pages of SPSS and related tutorials in addition to any information on the web pages themselves.

The longest chain of pop-outs looks like this:
